EXPERIENCE

Internship | AEHR Test Systems Philippines Inc.
February 2025- May 2025

As an intern at AEHR Test Systems Philippines Inc.. I contributed to creating solutions using modern technology, such as web systems, within the company. I also help in maintaining the ISO standard in the company to improve its quality workspaces.

- Developed a Human Resource System that helps the process of office DTR and Bill Submission, and generates consolidated data reports.
- Developed a Converter Web System that generates a consolidated report from the uploaded receipt files into an Excel report file.
- Conducted Daily Audits around the office area to maintain cleanliness, orderliness, and discipline using 5S - ISO Standard for the company's workspace.
- Generates reports in accordance with the office requirements, such as audits and inventory updates.
- Collaborating with the operation teams and other interns to ensure the projects and objectives are aligned and will integrate seamlessly with its goal.

TECHNICAL SKILLS

- **Computer Literate**
- **Web Development:** HTML, CSS, JavaScript, jQuery, Bootstrap, PHP
- **Database Management:** SQL, MySQL
- **Programming Language:** Basic foundation of Java, Python, C#
- **Microsoft Office Tools:** MS Word, MS PowerPoint, MS Excel
- **Tools:** Visual Code, Visual Studio, XAMPP, Canva, Open AI

SOFT SKILLS

Possess a friendly and positive attitude, strong teamwork, collaboration, and leadership skills, with abilities in problem-solving, adaptability, multitasking, organization, and time management.

PROJECTS

Modern Jeepney Tracker with Fare Calculator Monitoring System

My group built a system to track the modern jeepney and current fare for users using the mobile app, along with an admin web system to track, monitor, and assess the current company's daily operations. This is our Capstone project, and I serve as the team leader and a full-stack developer contributing to building both the front-end and back-end of the web and mobile app system.

- ❖ Developed a real-time tracking system for modern jeepneys using the GPS of smartphones.
- ❖ Integrated the map using Google Maps API and developed the web front-end using CSS, JavaScript, and Bootstrap.
- ❖ Store and manage data and database using PHP and MySQL.
- ❖ Implement CRUD functionalities (Create, Read, Update, Delete) for handling data in the system.
- ❖ Ability to generate PDF & Excel reports for the company's daily tracks.

Tech used: HTML, CSS, JavaScript, Kotlin, Google Maps API, PHP, MySQL, Bootstrap, AWS EC2 (free trial)

Human Resource System

A Human Resource System developed for company AEHR Test Systems as part of our internship/OJT program. This system helps the HR personnel in processing employees' data and managing their leave balances as well as their DTR and bill submissions.

- ❖ Created an employee side where they can submit DTR and bills and view leave balances, as well as an admin side where the HR can manage all the submission data and employee data.
- ❖ Implement sessions for both the employee and admin login to ensure the protection of every account.
- ❖ Implement CRUD functionalities (Create, Read, Update, Delete) for handling data in the system.
- ❖ Ability to generate consolidated Excel reports to help them in track with their submissions.

Tech used: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, (PhpSpreadsheet, PdfParser), XAMPP (local host)

CERTIFICATIONS

- • **Jun 2022 - Certificate of Completion- Java Foundations**
- • **Jun 2022 - Certificate of Completion- Systems Administration**
- • **Feb 2024 - Certificate of Completion- SAP Business One**
